NOTICE

The Oregon Department of Geology and Mineral Industries is publishing this paper because the subject matter is consistent with the mission of the Department. To facilitate timely distribution of information, the text has not been edited by the staff of the Oregon Department of Geology and Mineral Industries.

INTRODUCTION

This Directory was derived from a Departmental computer listing that was designed for internal use only. Company names were abbreviated, and some names and addresses may be obsolete. If errors or omissions are noted, corrections should be sent in writing to the Department, so that they can be incorporated in the next edition.

The directory is organized into two tables. Table 1 contains the mineral producers listed alphabetically by commodity. The first six columns indicate the name, mailing address, and phone number of each producer. The last two columns list the county and location of each mine or milling operation. Table 2 lists the name of each producer and the commodity produced under the name of the county in which the operation is located.
