Table 1. Mineral Producers by Commodity	1
Table 2. Mineral Producers by County	42

INTRODUCTION

This Directory was derived from a Departmental computer listing that was designed for internal use only. Company names were abbreviated, and some names and addresses may be obsolete. If errors or omissions are noted, corrections should be sent in writing to the Department, so that they can be incorporated in the next edition.

The directory is organized into two tables. Table 1 contains the mineral producers listed alphabetically by commodity. The first six columns indicate the name, mailing address, and phone number of each producer. The last two columns list the county and location of each mine or milling operation. Table 2 lists the name of each producer and the commodity produced under the name of the county in which the operation is located.
