

Tsunami Inundation Map Linc-05
Tsunami Inundation Maps for Otter Rock - Beverly Beach,
Lincoln County, Oregon

The Oregon Department of Geology and Mineral Industries (DOGAMI) has been identifying and mapping the tsunami inundation hazard along the Oregon coast since 1994. In Oregon, DOGAMI manages the National Tsunami Hazard Mitigation Program, which has been administered by the National Coastal and Atmospheric Administration (NOAA) since 1995. DOGAMI's work is designed to help cities, counties, and other sites in coastal areas reduce the potential for disastrous tsunami-related consequences by understanding and mitigating this geologic hazard. Using federal funding awarded by NOAA, DOGAMI has developed a new generation of tsunami inundation maps to help residents and visitors along the entire Oregon coast prepare for the next Cascadia Subduction Zone (CSZ) earthquake and tsunami, as well as for far-travelled, or 'distant' tsunamis.

This tsunami inundation map displays the output of computer models representing the two selected tsunami scenarios: Alaska M5.2 (1954) and the Alaska Maximum. All tsunami simulations were run assuming that prevailing tide was static (no flow) and equal to Mean Higher High Water (MHHW) tide; MHHW is defined as the average height of the higher high tides observed over an 18-year period at the Yakima Bay (Central Coast) model tide gauge. The map legend depicts the respective amounts of deformation and the earthquake magnitude for these two scenarios. Figure 3 shows the cumulative number of buildings inundated within the map area.

The 'Ring of Fire' also called the Circum-Pacific belt, is the zone of earthquake activity surrounding the Pacific Ocean. It is an arc stretching from New Zealand, along the eastern edge of Asia, north across the Aleutian Islands of Alaska, and south along the coast of North and South America (Figure 1). The Ring of Fire is located at the borders of the Pacific Plate and other major tectonic plates. The Pacific Plate is colliding with and sliding underneath other plates creating subduction zones that eventually release energy in the form of an earthquake rupture. This rupture causes a vertical displacement of water that creates a tsunami. When these events occur around the Ring of Fire but not directly off the Oregon coast, they take more time to travel the Pacific Ocean and arrive onshore in Oregon (Figure 2). Distant earthquakes/tsunami events have affected the Oregon coast; for example, offshore Alaska in 1964 and offshore Japan in March 2011.

Historically about 28 tsunami have been documented by Oregon tide gauges since 1854. The most severe was generated by the 1962 M6.2 Prince William Sound earthquake in Alaska. Oregon was hit with a tsunami that killed four people and caused \$1.5 billion to \$1.9 million in damage to bridges, houses, cars, boats, and sea walls. The greatest tsunami damage in Oregon did not occur until 1992, when a 6.9 magnitude earthquake in the Klamath Channel off the Oregon coast killed four people and caused \$1.5 billion in damage. The tsunami inundated by a 10 foot tsunami wave and was the hardest hit. Tsunami wave heights reached 10 to 11.5 feet in the Nahalem River, 10 to 11.5 feet in the Nehalem River, 10 to 11.5 feet in the Nehalem River, and 10 to 11.5 feet in the Nehalem River. The tsunami was recorded at Redpoint, 11 miles at Brookings, and 44 miles at Coos Bay (Wittmer and others, 2011).

Alaska-Aleutian Model Specifications: DOGAMI models two distinct earthquake and tsunami scenarios involving M9.2 earthquakes originating near the Gulf of Alaska. The first scenario attempts to replicate the 1964 Prince William Sound event, and the second scenario represents a hypothetical maximum event. This maximum event is the same model used by the U.S. Geological Survey (USGS) in their 2000 assessment of the potential for a Great PSW quake. This model uses extreme fault model parameters that result in maximum seafloor uplift nearly twice as large as in the 1964 earthquake. The selected source location on the Aleutian chain of islands also shows higher energy directed toward the Oregon coast than other Alaskan source locations. For these reasons the hypothetical "Alaska Maximum" scenario is selected as the worst case distant tsunami scenario for Oregon. Detailed information on fault geometries, subsidence, computer models, and the methodology used to create the tsunami scenarios presented on this map can be found in DOGAMI Special Paper 43 (Witter and others 2011).

[illegible]

	Entire Map Area	Depos Bay	Unincorporated Areas
Total Buildings	666	119	547
Buildings within Tsunami Zones*			
Alaska M9.2 (1964)		0	0
Alaska Maximum		1	1
Percent of Buildings within Tsunami Zones			
Alaska M9.2 (1964)		0.0%	0.0%
Alaska Maximum		0.2%	0.2%

Figure 3: The table and chart show the number of buildings inundated for the Alaska M9.2 (1964) and the Alaska Maximum tsunami scenarios for cities and unincorporated portions of the map.

Change in water level for two tsunami scenarios at the simulated gauge station shown on the map

Alaska M9.2 (1964)

Alaska Maximum

A2 Beverly Beach (Station A2)

Elevation, feet (NAVD83)

Time since Earthquake (hours)

Figure 4: This chart depicts the tsunami waves as they arrive at the selected reference point (simulated gauge station). It shows the change in wave heights for the two Alaska tsunami scenarios over an 8-hour period. Wave heights vary through time, and the first wave will not necessarily be the largest as waves interfere and reflect off local topography and bathymetry. Any absence of data indicates periods for which tsunami inundation has not yet reached or has receded from the station location and depth is assumed to be zero.

Figure 5: These profiles depict the expected maximum tsunami wave elevation for the two Alaska tsunami scenarios along lines A-A' and B-B'. The tsunami scenarios are modeled to occur at a static (no flow) tide and equal to the Mean Higher High Water (MHHW) high tide.

Earthquake Size	Slip / Deformation	Earthquake Magnitude
Alaska M9.2 (1964)	Vertical seafloor deformation estimate	~9.2
Alaska Maximum	Uniform slip on 12 subfaults with each assigned values ranging from 49 to 90 feet.	~9.2
Alaska Maximum Wet/Dry Zone		
Urban Growth Boundary	Fire Station	
Building Footprint	Police Station	
Simulated Gauge Station	School	
Profile Location	Hospital/Urgent Care Clinic	
Senate Bill 379 Line	U.S. Highway	
State Park	State Highway	
Elevation Contour (25 ft. intervals up to 200 ft.)	Improved Road	

Map of Oregon showing 15 numbered locations for the 2015-2016 season. The locations are distributed across the state, with a concentration in the Willamette Valley and along the coast. The map includes labels for major regions: Willamette Valley, Oregon, and the Coast Range. The locations are numbered 01 through 15, with some numbers appearing in multiple locations. The locations are:

- 01 - Lincoln City North
- 02 - Lincoln City South
- 03 - Gleneden Beach - Silette River
- 04 - Depoe Bay
- 05 - Newport North
- 06 - Newport South
- 07 - Newport South
- 08 - Newport South
- 09 - Newport South
- 10 - Newport South
- 11 - Newport South
- 12 - Newport South
- 13 - Newport South
- 14 - Newport South
- 15 - Newport South

This map is based on hydrodynamic tsunami modeling by Joseph Zhang, Oregon Health and Science University, Portland, Oregon. Model data were created by John T. English and George P. Fried, Department of Geology and Mineral Industries (DOGAMI), Portland, Oregon.

Hydrology data, contours, critical facilities, and building footprints were created by DOGAMI. Seismic 600 370 line data were redigitized by Rachel L. Smith and Sean G. Pidenen, DOGAMI, in 2011 (GIS file set, in press, 2012).

Urban growth boundaries (2011) were provided by the Oregon Department of Land Conservation and Development (DLCD).

Transportation data (2007) provided by Lincoln County were edited by DOGAMI to improve the spatial accuracy of the features or to add newly constructed roads not present in the original data layer.

Lider data are from DOGAMI LIDER Data Quadrangles 14001-14124-14131-14132-14133-14134-14121-14122-14123-14124-14125-14126-14127-14128-14129-14130-14131-14132-14133-14134-14135-14136-14137-14138-14139-14140-14141-14142-14143-14144-14145-14146-14147-14148-14149-14150-14151-14152-14153-14154-14155-14156-14157-14158-14159-14160-14161-14162-14163-14164-14165-14166-14167-14168-14169-14170-14171-14172-14173-14174-14175-14176-14177-14178-14179-14180-14181-14182-14183-14184-14185-14186-14187-14188-14189-14190-14191-14192-14193-14194-14195-14196-14197-14198-14199-14200-14201-14202-14203-14204-14205-14206-14207-14208-14209-14210-14211-14212-14213-14214-14215-14216-14217-14218-14219-14220-14221-14222-14223-14224-14225-14226-14227-14228-14229-14230-14231-14232-14233-14234-14235-14236-14237-14238-14239-14240-14241-14242-14243-14244-14245-14246-14247-14248-14249-14250-14251-14252-14253-14254-14255-14256-14257-14258-14259-14260-14261-14262-14263-14264-14265-14266-14267-14268-14269-14270-14271-14272-14273-14274-14275-14276-14277-14278-14279-14280-14281-14282-14283-14284-14285-14286-14287-14288-14289-14290-14291-14292-14293-14294-14295-14296-14297-14298-14299-14300-14301-14302-14303-14304-14305-14306-14307-14308-14309-14310-14311-14312-14313-14314-14315-14316-14317-14318-14319-14320-14321-14322-14323-14324-14325-14326-14327-14328-14329-14330-14331-14332-14333-14334-14335-14336-14337-14338-14339-14340-14341-14342-14343-14344-14345-14346-14347-14348-14349-14350-14351-14352-14353-14354-14355-14356-14357-14358-14359-14360-14361-14362-14363-14364-14365-14366-14367-14368-14369-14370-14371-14372-14373-14374-14375-14376-14377-14378-14379-14380-14381-14382-14383-14384-14385-14386-14387-14388-14389-14390-14391-14392-14393-14394-14395-14396-14397-14398-14399-14400-14401-14402-14403-14404-14405-14406-14407-14408-14409-14410-14411-14412-14413-14414-14415-14416-14417-14418-14419-14420-14421-14422-14423-14424-14425-14426-14427-14428-14429-14430-14431-14432-14433-14434-14435-14436-14437-14438-14439-14440-14441-14442-14443-14444-14445-14446-14447-14448-14449-14450-14451-14452-14453-14454-14455-14456-14457-14458-14459-14460-14461-14462-14463-14464-14465-14466-14467-14468-14469-14470-14471-14472-14473-14474-14475-14476-14477-14478-14479-14480-14481-14482-14483-14484-14485-14486-14487-14488-14489-14490-14491-14492-14493-14494-14495-14496-14497-14498-14499-14500-14501-14502-14503-14504-14505-14506-14507-14508-14509-14510-14511-14512-14513-14514-14515-14516-14517-14518-14519-14520-14521-14522-14523-14524-14525-14526-14527-14528-14529-14530-14531-14532-14533-14534-14535-14536-14537-14538-14539-14540-14541-14542-14543-14544-14545-14546-14547-14548-14549-14550-14551-14552-14553-14554-14555-14556-14557-14558-14559-14560-14561-14562-14563-14564-14565-14566-14567-14568-14569-14570-14571-14572-14573-14574-14575-14576-14577-14578-14579-14580-14581-14582-14583-14584-14585-14586-14587-14588-14589-14590-14591-14592-14593-14594-14595-14596-14597-14598-14599-14600-14601-14602-14603-14604-14605-14606-14607-14608-14609-14610-14611-14612-14613-14614-14615-14616-14617-14618-14619-14620-14621-14622-14623-14624-14625-14626-14627-14628-14629-14630-14631-14632-14633-14634-14635-14636-14637-14638-14639-14640-14641-14642-14643-14644-14645-14646-14647-14648-14649-14650-14651-14652-14653-14654-14655-14656-14657-14658-14659-14660-14661-14662-14663-14664-14665-14666-14667-14668-14669-14670-14671-14672-14673-14674-14675-14676-14677-14678-14679-14680-14681-14682-14683-14684-14685-14686-14687-14688-14689-14690-14691-14692-14693-14694-14695-14696-14697-14698-14699-14700-14701-14702-14703-14704-14705-14706-14707-14708-14709-14710-14711-14712-14713-14714-14715-14716-14717-14718-14719-14720-14721-14722-14723-14724-14725-14726-14727-14728-14729-14730-14731-14732-14733-14734-14735-14736-14737-14738-14739-14740-14741-14742-14743-14744-14745-14746-14747-14748-14749-14750-14751-14752-14753-14754-14755-14756-14757-14758-14759-
